

## About Me

Hello! I'm Dito Aditya Sembiring Kembaren, a passionate programmer specializing in web and software development.

With a keen interest in crafting innovative solutions, I strive to bring creative ideas to life through code.

## Interest

I am passionate about embracing and exploring new technologies, constantly seeking the latest advancements and trends. My interests extend to optimization strategies, delving into code efficiency, and enhancing system performance. I thrive on learning and experimenting with new frameworks, libraries, and development tools to improve productivity. Additionally, I am deeply fascinated by problem-solving, innovation, algorithmic thinking, and the implementation of efficient data structures to tackle complex challenges within the tech sphere.

## Technologies I Work With

- PHP
- CSS
- HTML
- Node.js
- Laravel
- Arduino
- Selenium
- Docker
- CodeIgniter
- React
- Go
- Python
- MySQL
- Flask
- Flutter
- Git

## Project

Project	Description
Face-Recognition-Attendance-System	Attendance system by capturing faces through a webcam implemented in Python
Smart-Garden-IoT-System	An IoT project using ESP8266 microcontroller to monitor and control a garden
Go-HTTP-Server	Go HTTP server that handles different routes and requests
